

teknion leverage

teknion

Leverage® makes it easy to customize the office, allowing you to specify the desired level of features for each workspace, while achieving a crisp, clean look at an affordable price.

The following attributes fulfill these diverse requirements:

wide range of panel options

- Choose among four segmentation styles to achieve both the functionality and the aesthetic desired
- Opt for an integrated baseboard, a floor-flush design or an elevated base
- Manage cables with a high-capacity lay-in trough option on all panel types

off-module planning

- Connect panels, worksurfaces and mounted storage off-module for optimal use of space and inventory

stackable

- Increase or lower panel height on-site without disruption to the work area

interchangeable elements

- Change panel surfaces easily to alter the look or function of a workstation

120-degree planning

- Expand planning capabilities

Designed with attention to detail, Leverage offers visually refined attributes. Glass Add-On Screens with precision-fitted seams create the appearance of a clean run of glass and tight transitions at corners. Leverage also offers aesthetic options with a choice of narrow or wide panel gaskets, and panel top trims of varying thicknesses for a lighter or more robust look.

Leverage offers a variety of panel Elements in segmented or monolithic formats. Segmented Elements provide maximum versatility and functionality. They can be interchanged on-site and accept different Element styles on either panel side to modify the look and function of a workspace. Monolithic Elements create a clean aesthetic ideal for corridor application.

Incorporating storage and accessories from other Teknion lines achieves added functionality and new aesthetic qualities. Interpret Lateral Mounted Storage is placed perpendicular to the worksurface, providing a standing-height surface for collaboration.

Ease of installation and reconfiguration are built into Leverage. Panels are designed with posi-lock connectors that facilitate easy panel-to-panel connection without the need for tools. Leverage worksurfaces feature threaded metal inserts that permit repeated reconfiguration without material wear and tear. In addition, the Power/Communications Element rotates to accommodate power/data access at the base or worksurface height.

Leverage integrates visually and functionally with District storage. District credenzas with storage screens support Leverage panels while optimizing vertical and horizontal space. Worksurfaces mount to District storage lockers, which help to define space where panel features are not required.
